

Test Execution Report

Project Name: Parabank Automation Framework with CI/CD

Application Name: Parabank Banking Application

Execution Date: DD/MM/YYYY

Executed By:

Environment: Chrome Browser, Windows 10, Java 21

Build Version: 1.0

Execution Summary

Metric	Count
Total Test Cases Executed	16
Passed Test Cases	16
Failed Test Cases	0
Blocked Test Cases	0
Pass Percentage	100%
Fail Percentage	0%

Detailed Execution Report

Test Case ID	Module	Test Case Description	Status
TC_001	Login	Verify login with valid credentials	Pass
TC_002	Login	Verify login with invalid credentials	Pass
TC_003	Login	Verify login with blank credentials	Pass
TC_004	Login	Verify login error message	Pass
TC_005	Account Overview	Verify account overview page	Pass
TC_006	Account Overview	Verify account balance display	Pass
TC_007	Account Overview	Verify account number display	Pass
TC_008	Account Overview	Verify account summary accuracy	Pass
TC_009	Transfer Funds	Verify fund transfer functionality	Pass
TC_010	Transfer Funds	Verify transfer with valid amount	Pass
TC_011	Transfer Funds	Verify transfer confirmation message	Pass
TC_012	Transfer Funds	Verify transfer transaction update	Pass
TC_013	Bill Pay	Verify bill payment functionality	Pass

Test Case ID	Module	Test Case Description	Status
TC_014	Bill Pay	Verify bill payment confirmation	Pass
TC_015	Bill Pay	Verify bill payment history update	Pass
TC_016	Bill Pay	Verify bill payment success message	Pass

Execution Result

All automated test cases were executed successfully through the Selenium TestNG automation framework. The GitHub Actions CI/CD pipeline triggered automatically and completed the execution without any failures.

Conclusion

The Parabank application functionality covered under Login, Account Overview, Transfer Funds, and Bill Pay modules is working as expected. The automation framework and CI/CD pipeline executed successfully and generated the required test reports.
